# LEARN BLUES FINGERPICKING

## **INTERMEDIATE COURSE**

## 2.3 Riffs in Position 2

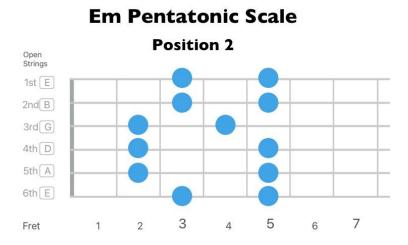

## **Intro**

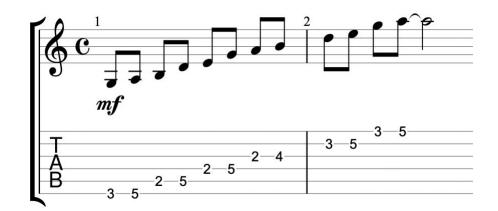

In this lesson, we will look at the Em Pentatonic scale & E Blues scale in position 2 of the guitar neck. This is the position between  $2^{nd}$  and  $5^{th}$  frets.

Remember we get the E blues scale by just adding one note to Em Pentatonic so it's not as much work as it sounds! Then we'll learn 4 riffs that use this scale so that we actually get to play something musical.

Here is the chart for the Em Pentatonic scale:

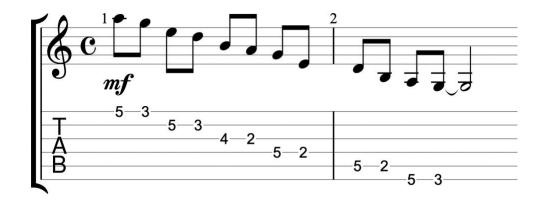

Here is the tab for the Em Pentatonic scale ascending:

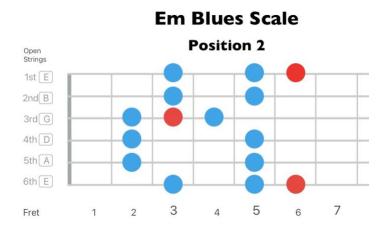

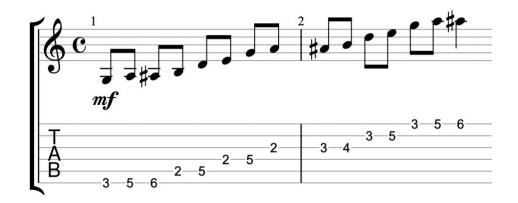

And the Em Pentatonic scale descending:

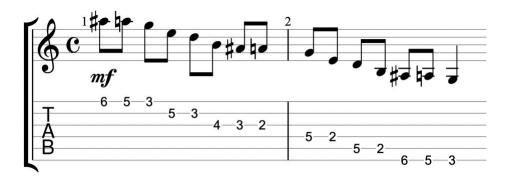

As mentioned above, we just add one note to Em Pentatonic scale to get the E Blues scale and that note is highlighted here in red (the blues note it is sometimes called). In E, that note is Bb.

We have the tab for E Blues scale in position 2 ascending:

And then descending:

Now it's time for some riffs!

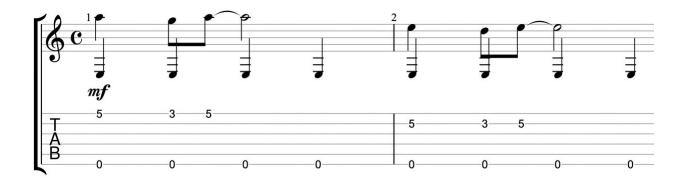

#### Riff A

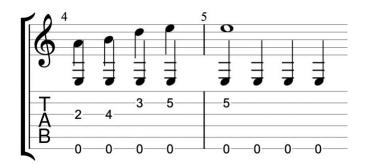

The first half of this riff involves playing a riff note with the bass and then 2 riff notes per one bass note.

It's the first time we have done this so take your time with it.

We repeat the same motif first on the 1st string then on the 2nd string

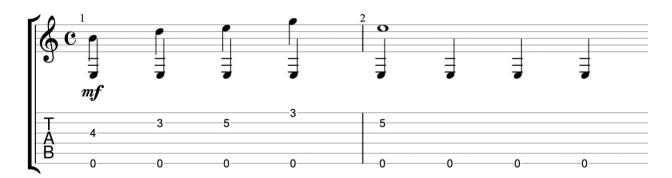

The second half of this riff is simpler with one riff note per bass and then letting the last note ring for a whole bar.

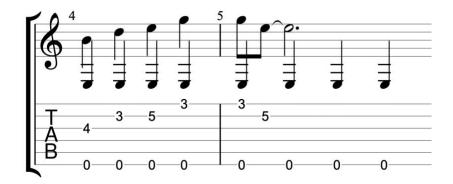

#### Riff B

The first half of this riff involves playing 4 notes (all from Em Pentatonic scale) and then letting one note ring for a whole bar.

The second half of this riff is similar at the start but for the last bar, we play 2 notes per one bass note.

You could cycle this last bar and do those 2 notes (with a bass note) and just 3 more bass notes (counting "two three four") and then repeat to get the feeling of that "2 notes per one bass note".

## Riff C

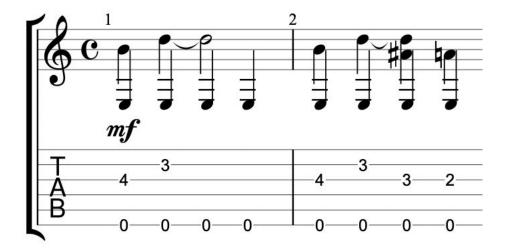

This riff just repeats (the first half and second half are the same)

Because we add the blues note (the 3<sup>rd</sup> string at the 3<sup>rd</sup> fret) we are playing in the E blues scale rather than Em pentatonic.

I suggest playing this melody first and then add the bass.

#### **Adding the Bass**

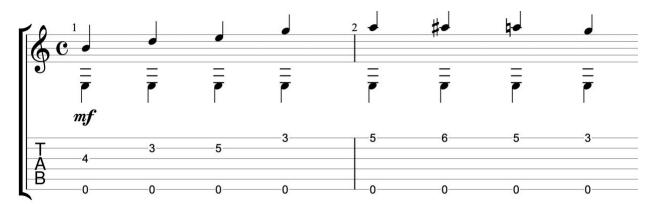

Here we play 2 notes with the bass – then 2 bass notes alone – then 4 more notes with the bass.

## Riff D

This riff goes on a long run – all notes from the E blues scale. Note the blues note on the  $1^{st}$  string at the  $6^{th}$  fret.

At the end of this run of 8 notes, we play a ninth note and let it ring. And then we just have two notes in the last bar (the second of which we let ring)
